This Is The Time To Grow More Fruit

Strawberry prices were the best last season that I have ever known them, and the prospects are for even higher prices this season. Pittsville is one of the largest strawberry shipping stations in the country, and I am sure there were not one tenth as many plants set in this section last spring as there has been in the preceding springs, and from the reports that I have received this was the case all over the country. There were several causes for this: scarcity of labor to set the plants, and the growers did not know whether they would be able to get what they already had growing picked or not; the railroads were so overtaxed with freight that it looked as if they would have very poor and slow deliveries, even if they could get them picked. All in all, there certainly was not much encouragement to plant a very large acreage, but when picking time came everything was exactly the opposite of what was expected; there were plenty of pickers, transportation was the best in years, and ideal weather the season through. And as predicted in my last season's catalog, we cleared the most money per acre that we have ever done. If the weather is favorable at picking time I can't see why prices will not be higher this season than they were last. I also look for very good prices for the next two or three seasons at least. Plants are very scarce and nurserymen have not anything like enough to supply the demand there will be for them this season. The extremely dry, hot, windy weather last summer was the hardest on plant growth that I have ever experienced. While I increased my acreage I will not have 50 per cent. of a crop of plants, but what I have are the best rooted that I ever saw; they have had plenty of room to grow and took advantage of it.

This shortage of plants, with increase in cost of labor, fertilizer and all that enters into the growing, digging and packing of the plants has forced me to charge higher prices for them this season, but I promise you that just as soon as it is possible the price will be lowered. At this writing I have orders booked for more than half my entire stock of plants, and could have sold all of them at wholesale but did not think it fair to my regular customers to do so. If you expect to set a patch of strawberries this spring order your plants just as early as you know what you will want—don't fail to do this, whether you place your order with me or some other grower. Last season I had to return lots of orders because they were received after I had sold out of the stock ordered, and the supply is even less this season that it was last; but while I advise you to set plants this season don't set more than you can properly care for. We need all the food that we can grow, and any planting stock that is wasted cuts our food supply that much.

Since writing the above peace has been declared. This will mean a bigger demand for our foodstuffs. We will now have to help feed the peoples we have been fighting, as they are not in a position to grow enough to feed themselves. This should cause even higher prices than formerly.

Yours for a Successful Year,

LEAMON G. TINGLE, Pittsville, Md.

BEFORE ORDERING READ THIS

TERMS. Payment invariably, cash in advance. Remit by Money Order, Registered Letter or Draft.

HOW TO ORDER. Send me your order as soon as convenient, then I will reserve the stock for you and ship when wanted. Be sure to write your name and address plainly, and state how goods are to be shipped; whether by Parcel Post, Express or Freight, and state plainly to what point you want them sent.

AT PURCHASER'S RISK. The ownership of all goods sold by us passes to the purchaser on delivery by us to the carrier, and the issuing of a receipt by the carrier ends our responsibility. Any claims for damage should be made promptly to the agent at the point of delivery. Under no conditions may I be held responsible for safe delivery.

PACKING. I make no charge for packing and delivering to station at prices in this catalog.

SHIPPING SEASON. I begin filling orders about October 1st, sometimes a little earlier, and continue digging and shipping during the entire fall, winter and spring until May 1st. We are sometimes delayed in January and February and early part of March by freezing weather, but usually able to ship at times during these months.

Telegraph or Telephone me at Pittsville, Md.

TRUE TO NAME. We use every care to have plants true to name and we will not be responsible for any sum greater than the original cost of stock should any prove not true to name.

CLAIMS, if any, must be made on receipt of goods, and if just, will be made satisfactory. I send out only good stock in good condition, carefully packed in all cases, but success or failure depends in so large a degree upon the care and management after received that I do not, because I cannot, undertake to guarantee stock to live.

SUBSTITUTION. Late in the season we usually run short of some varieties listed herein; therefore, when you order late, please state on order sheet if you do not want me to substitute should I be sold out of the variety you order. If we substitute will give you a variety as near like the variety you ordered as possible.

INSPECTION. A Certificate of Inspection from our State Entomologist and State Pathologist will be attached to each and every shipment of stock.

Special Prices. We quote very attractive prices on large orders. Send us your want list for quotations.

When you receive two catalogs, please hand one to your neighbor.

Strawberry Plants

CHESAPEAKE—One of the very best mid-season to late varieties.

Description of Varieties

AMANDA. One of the very best large-fruited varieties grown; the plants are vigorous, healthy, large and upright in growth; blossoms are perfect. Growers wishing an extra-large, good-quality berry should plant some Amanda. It is also a very heavy fruiter and a berry that should bring top prices on any market which appreciates large, fancy fruit.

AROMA. One of the best late varieties. Plants are large, very vigorous and healthy; fruit large to very large, roundish, of a bright glossy red, of excellent quality and one of the most productive late varieties. Can always be depended on to bear a good crop of fine berries.

BEDERWOOD. A good early variety for home use or market. It is a splendid grower, making a large number of strong runners. It has a perfect blossom and immensely prolific. Fruit of good size, light red, medium firm, and good quality.

BUBACH. Its large and uniform size, fine form and color, unsurpassed productiveness and great vigor combine to make it one of the leading market sorts.

BRANDYWINE. A vigorous, perfect-blooming plant; tall fruit-stalks; broad, heavy dark green foliage. Plants productive, having four and five stalks heavily loaded with large to very large berries. Medium red, somewhat like Gandy, only a little more dull; large yellow seeds on surface. Flesh red clear through, firm, somewhat acid, but with sprightly flavor; ripens medium to quite late. Does best on heavy loam or heavy clay.

BIG VALLEY. If you have a local market that demands something extra large and fancy this will fill the bill. A mid-season variety producing berries of the most excellent flavor, not too acid, but just a mild, sweet flavor. Very productive. Try it.

CHESAPEAKE. Undoubtedly the most popular berry grown today and deservedly so. I have never seen a more perfect berry; the berries are extra large and hold up well to the last picking; very firm, and I do not know of a better shipper, carrying to the distant markets in perfect condition; flavor unexcelled; a heavy cropper and makes just enough plants for a good fruiting bed, the plants are large and healthy. If I had to confine myself to just one variety of strawberries as a profit-maker I would unhesitatingly choose Chesapeake. The price of Chesapeake plants will never be so low as most other varieties on account of it making just enough plants for a good fruiting bed and it pays growers much more profit to pick the berries than it does to sell the plants. I only have a limited stock of these this season as they did not make more than one-half as many plants as they usually do and I have had to increase my prices for them, but even at this price I believe you will find them a good buy.

CHAMPION K. A seedling of Klondyke, which it resembles but is larger in both fruit and plant. I have fruited it two seasons and the more I see of it the better I like it. I consider it a real improvement on the Klondyke. If you have been growing Klondyke, try a few Champion K. and I am sure you will like it.

CAMPBELL'S EARLY—Said to be the best early berry grown in New Jersey.

CAMPBELL'S EARLY. This is a new extra-early variety of great promise. In New Jersey where it originated the growers are very enthusiastic over it. One leading grower says: "Campbell's Early comes in ahead of them all, growing from such large, healthy plants with a light green, waxy, upright foliage protecting the great crop of large, beautiful, rich red berries. They have a beautiful green calyx and come second to none in flavor. One of the most wonderful features of the Campbell's Early is that practically all grow to full size and no knotty, ill-shaped berries; they ripen perfectly all over with no green ends. They are fine, vigorous growers, have perfect blossoms, and will retain their firmness in carrying to distant markets.

CHARLES FIRST. The introducer claimed this would ripen nearly a week earlier than Michel's Early, but with me it ripens at about the same time. Every season excepting one since I have been growing it I have sold out of plants very early. It is a very popular seller and must have some extra good qualities. The berries are very large, regular in form and of good quality.

CORSICAN. A favorite home and nearby market variety in many sections. It is one of the very largest, holding its size well through the season, beautiful dark crimson color, rich and delicious. Plant a strong grower with good healthy foliage, producing large crops.

DORMAN. A big and reliable producer of extra-large heart shaped berries of a bright red color and high quality. Claimed to sell for more on the Chicago market than any other variety. A good one for the home table as well as for market.

DR. BURRILL. A new variety that is growing very popular, somewhat resembling Senator Dunlap in appearance. The berries are large and beautifully formed. The surface of the berry is a deep glossy red, the meat is solid and rich. As a canner it surpasses Warfield. In flavor it is milder and more delicious than Senator Dunlap. The berries are excellent shippers and good keepers. An ideal berry for either home use or for the market.

ETTERSBERG No. 80. Very productive of fine red berries, that are of large size and have a large, clean-cut green calyx or hull. The blossoms are very large and the runners very strong. The plant is extra

vigorous and deep rooting and the foliage leathery. In the fall of the year the foliage is of a bluish cast. The fresh fruit is of fine dessert quality, and for flavor as a canned berry it is the very best, a deliciousness found in no other variety. It is red and red to the center, and will not break up in processing.

EARLY JERSEY GIANT. Ripen with the very earliest. Berries very large, brilliant scarlet-crimson, conical with pointed tip, colors all over at once, has delightful and rich mild wild strawberry flavor. Large light green calyx or "cap," hence exceedingly showy and attractive. Blossoms large, perfect, rather late, thereby missing the late frosts. Plant is a strong grower with large leaves on long pliant stems and a heavy yielder. I have never had enough Early Jersey Giant plants to supply my demand for them.

DR. BURRILL—Sure to grow and bear.

GANDY—One of the oldest and best very late berries on my list.

EDMUND WILSON. A unique variety. On good soil the plants attain a height of twelve to fifteen inches with a spread of fully a foot and are enormously prolific. The berries are very large, globular or bluntly heart shape, of deep maroon color with smooth surface and quite firm. Perhaps the richest in sugary lusciousness of all. Ripens in mid-season.

EKEY. A vigorous growing variety that produces an abundance of large conical berries. The berries are of good quality and are firm enough to ship. The blossoms are perfect and produce an abundance of pollen. If you ship berries to the Philadelphia market you should plant some Ekey; it brings a premium over other sorts. Also good for home market.

GLEN MARY. Probably no variety of strawberries will produce more quarts per acre than Glen Mary. It is very popular throughout the northern half of the United States and especially in Pennsylvania, New York and New England. Firm enough for distant shipping. It is of handsome appearance and good quality. The fruit is of large size and dark red in color with prominent seeds of bright yellow. The meat is so rich and juicy and of such high flavor that, when once eaten, more is wanted. Glen Mary is a strong grower which makes large, healthy plants, with an abundance of dark green foliage. Not only is Glen Mary a heavy cropper, but the berries are of such quality and attractiveness that they bring top prices on the market.

GANDY. One of the universal favorites, and as a "money-maker" hard to beat. A good grower with tall healthy foliage, and produces large, dark crimson berries, that when fully ripe, are of excellent quality. It is a splendid berry and always brings fancy prices. A free plant maker and a good grower, while its extra firmness makes it keep on the vines longer than almost any I know. Late. If you grow late strawberries you need Gandy.

GOLD DOLLAR. Produces a heavy crop of large-sized, highly colored berries that are perfect in shape. It has perfect blossoms, every one of which matures a good berry. Ripens medium early.

HUSTLER. It is a vigorous grower, making a few large, strong plants rather than many small ones. The fruit averages large in size, is quite uniform, and firm enough to ship to a distant market. The berries are a rich scarlet in color, most excellent in quality and altogether one of the handsomest berries that I know. The blossoms are imperfect. With its big green cap, it is a variety that attracts the attention of buyers and nearly always sells at a premium.

HOWARD No. 17. A new variety from Connecticut. Described by a reliable Connecticut grower as follows: "The earliest fancy variety that I have ever seen. The first fruit to ripen is fully as large as Chesapeake, fully as firm and the quality fully as good. It is of the same cone shape and the color much the same, possibly not quite so dark but glossy and handsome. Will yield three times as much fruit as Chesapeake and is on the job a week before Chesapeake begins to ripen. So great is my faith in this variety that more than one-half of all I set the coming spring will be Howard No. 17. This variety has come in competition with hundreds of competitors on the grounds of the Connecticut Agricultural College and vanquished them all, not only for one or two years, mind you, but for ten years." I have never fruited it except on plants set spring, but they were fine and so favorably impressed was I with them that I expect to set a nice lot of them this spring for fruit. How many do you want? I only have about twenty thousand to sell, so get your order in early.

HAVERLAND. Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties. It will stand more frost than most any other variety, often bearing large crops when others are killed. We can always depend on a large crop. Few varieties will produce more fruit per acre or sell for more money. The demand for plants is always great.

HERITAGE. A long season variety—from quite early until quite late. The berries are large, many of them very large, and the yield is heavy. The quality is fair and the texture firm. The plants are vigorous and healthy, and yield so bountifully it has much value.

JOE JOHNSON—Will make you big money

HUNDRED DOLLAR. A very valuable and mid-season variety. The introducer's claim that "there is not another variety of strawberry that will outyield this giant or surpass it in quality" has to a large degree been fulfilled. The plant is a strong, vigorous grower, and among the most prolific. The berries average very large indeed, the color is bright scarlet and the quality mild, sweet and luscious. It is not very firm—not firm enough for long shipment. There are indeed few varieties more valuable for nearby markets or for the home garden.

JOE JOHNSON (BIG JOE). This is one of the best berries on the list. Above medium in size, almost perfect in shape, very solid, bright red in color, and a good heavy bearer for so large a berry. The fruit is borne on long stiff stems, well up from the ground. Plants are very large and deep-rooted. Strong grower, dark green in color. A bed of Joe Johnson in fruit is about as handsome a sight as one often sees and it is a money-maker for both nearby and distant markets. Don't fail to plant Joe Johnson.

KELLOGG'S PREMIER. I am giving a part of the introducer's description: "Kellogg's Premier is distinctly in a class by itself. In productiveness it is a wonder. The berries are mammoth in size, beautifully formed, bright, rich red through and through, delicious in flavor, and a splendid shipper. In one word, every berry is a show-berry and a prize-winner. It is the money-making king of all early berries. Last year the Premier began ripening berries fully a week earlier than any other variety, and continued to fruit heavily for more than four weeks. And the last picking was as good as the first. Another quality in which the Premier excels is that of a pollenizer for pistillate varieties, a characteristic of unusual value because of its long blooming season. If you believe you have already seen the greatest early berry, but as yet never seen Kellogg's Premier, you still have something worth while to discover in the strawberry world. And if you would grow strawberries that will sell at your own price, no matter how many other berries are on the market, the Premier is the variety for you to choose."

KELLOGG'S PRIZE. A pistillate variety with a very long fruiting season. It thrives in soils of every class, and yields immense quantities of large, perfectly formed berries, highly colored from center to circumference, its golden seeds lending a gloss to the surface of surpassing brilliancy and beauty. There is no other berry having a flavor of greater delicacy. Foliage large and healthy; calyx large and green. One of the heaviest fruiters I have ever grown, and I recommend them to you for trial.

KELLOGG'S BIG LATE. The introducer says of Big Late—It has been thoroughly tested for three years and each year it has outyielded all of the old standard late varieties. When it comes to quality and flavor, its berries are in every way superior to the berries of any other variety with which we are acquainted. The originator says that the berries are so firm that they carry to remotely distant parts and arrive in prime condition. It is a strong, vigorous-growing pistillate with large healthy leaves, and it roots very deeply. The berries are produced in clusters on long fruiting stalks. The color of the berries is a deep scarlet, seeds bright yellow, calyx bright green, and fruit stems are large, making a combination which attracts the attention of the buyer, no matter how many other berries are offered in competition.

KLONDYKE. Berries uniform in shape and size, dark red, mild and delicious, very handsome. Plants make a remarkable growth, are tall and compact, stalks strong, leaves light green, makes abundant runners and an unusual number of crowns. One of the very best paying early varieties, and is such a good shipper that its appearance in the market causes it to be eagerly bought by those who are ready to pay good prices for fancy fruit. Plant Klondyke for more trade and more profit.

LADY CORNEILLE. Claimed by many to be better than Klondyke. It makes plenty of plants on any soil. Blossoms perfect. The fruit is large, conical, rich dark red, covered with golden seeds which adds to its firmness. It is more productive than Klondyke and adapted to light or stiff soils and is extensively planted in a great many sections.

LATE JERSEY GIANT. Plants are very large and vigorous. Fruit is heart-shaped, uniform in shape and size; exceedingly productive, firm and of the very best quality. A rather new variety, but is extensively planted by all that have given it a trial. The berries are produced in clusters on large strong fruit stocks.

LUPTON. The introducer describes it as follows: The plant is healthy and long-lived, foliage heavy, dark green, fruit stalks short, berries set under the leaves and well protected; flower perfect, berry large, bright red, glossy, and doesn't turn dark after being picked. Its season is about five days ahead of the Gandy, from which it is a seedling and lasts nearly as long. I have grown all the leading varieties by the Lupton, but have never found one that would produce with it. It sells for the highest market prices and is especially recommended by commission merchants for long distance shipment on account of its firmness and good keeping qualities.

MAGIC GEM—Truly a gem and a heavy fruiter of extra fancy berries. Try it.

MAGIC GEM. A mid-season-to-late variety originated by Edward Vance of Idaho. Because of the unusually large size and high quality of the berries and its long fruiting season, Mr. Vance has controlled the strawberry trade in his local market. The berries are not only large and abundant but they also are beautifully formed and are distinctly cone-shaped. The berries are highly colored, being dark red with a glossy surface, and bright yellow seeds which are imbedded in the surface just deep enough to produce a beautiful contrast. The flavor of the fruit is mild and delicious. The calyx is a dark, rich green, which adds to the beauty of the berry. The berries are very firm and ship exceedingly well.

MATTHEWS. A new variety of the Klondyke type that has given great satisfaction where it has been grown. The berries are uniform in size, light in color, and of firm texture, resembling the Klondyke; but the fruit is larger and more pointed and has a more attractive cap than Klondyke. Most important of all, it produces more berries per acre. If you are growing berries for distant markets, you should try the Matthews.

MESSENGER. The fruit begins ripening with the early varieties and continues for a long season. The berry is of extra large size, well colored, and very firm, making it a good shipper, excellent flavor, a good market or home table berry. The plants are exceedingly vigorous—the strongest of any early berry I ever saw. The foliage is clean and healthy, almost, if not quite as rank as the Chesapeake, which it resembles very much. I believe this berry will prove a money-maker to those who plant it and I advise you to secure enough of the plants to give it a thorough test.

MARSHALL. Too well known to need any extended description. This is a berry that has been so popular in the New England market for years, where the grocers are always delighted to get it on account of its rich dark red color, that it is bound to attract and please customers. It is one of the richest flavored strawberries grown. It is a strictly fancy berry. Mid-season. I have the finest and largest stock of Marshall this year that I have ever grown.

MISSIONARY. A variety that is proving very popular all through the South. It is a strong grower, making plants freely; early to mature, coming in right after Excelsior, and very productive. The berries are well colored, firm, large, and hold their size well throughout the season. It is a good shipper, having a tough skin not easily broken by handling.

MICHAEL'S EARLY. An old favorite. For eating from the vines after it is full ripe there is probably nothing better. Those who have a garden or a good local market for an extra early berry will find the Michael's just what they want.

McKINLEY. Unrivalled as a strawberry of high quality. Berries large, handsome and freely produced on strong growing, healthy plants. Ripens in mid-season and is too tender in texture to endure shipment. It is pre-eminently a variety for the home garden.

McALPINE. Here is a very fancy mid-season to late berry if you will not let the plants get too thick in the bed. It is a very heavy fruiter and I never saw more perfect berries, large and every one as near alike as it is possible for a berry to be. The berries bring the top prices on the markets.

NEW YORK. This is the strawberry that was awarded a prize of \$100 which was offered for the best and largest variety. The plant is an unusually robust grower, making but few runners, throwing its strength and vigor into the magnificent berries, which are produced in great abundance and are of immense size. In form they are very handsome and regular, of a roundish conical shape. Color a crimson-scarlet, dark, rich and inviting, coloring all over and leaving no green tips. The flavor is deliciously rich and melting. For a family strawberry it is one of the best, but its large size and delicate texture would possibly prevent the berries from arriving in good condition in distant markets. This berry is so popular it has been introduced under many different names.

NORWOOD. Medium early, the plant is strong and healthy. The quality is unsurpassed, and the size unequaled, some attaining enormous size. Color bright red all the way through, growing darker with age; firm, a good keeper, and will ship well.

PITTSVILLE—This new berry will make you money. Plant it.

PARSONS' BEAUTY. One that may be depended upon to produce a large crop of fruit every season. The plants are splendid growers on any soil and without a sign of disease. The fruit is large, conical, uniform shape, dark red and fair quality. Largely planted by commercial growers on account of its vigor and productiveness.

PITTSVILLE. A new mid-season variety beginning to ripen about the same time as Senator Dunlap, which it resembles in some respects but is not as dark a color and is very firm, making it a good shipper. Will stay firm a long time after being picked. Has a beautiful double green cap. Holds its large size from first ripening until the last picking. The plant is large and healthy; very deep rooted, making it a good one to plant in dry soils.

PAUL JONES. This is one of the best varieties ever introduced. It always produces a large crop of the finest fruit on any soil and in any weather. The fruit is of the larger size and holds its size to the very last, is of even size and shape and of the finest flavor, a splendid keeper and a variety you will make no mistake in planting.

RYCKMAN. Its great size and productiveness, thrifty growth and delicious flavor makes it one of the most valuable berries ever grown for business purposes. Many extensive growers say that it produces even larger crops the second year than it does the first. It is also noted as an extremely valuable variety for poor soils and for fruiting continuously on the same ground for several years. It ripens in mid-season and is a perfect flowered variety.

SAMPLE. One of the very best strawberries and a money-making late variety. Sample produces a very heavy crop of nice, showy berries of large size and fine quality, continues a long time in fruit, the berries being large to the last. It will yield as many berries as Haverland and will average as large as Bubach. Colors all over at once—fruit perfect, foliage perfect.

SHARPLESS. The standard of quality. Plants vigorous and healthy. Berries very large, light colored, irregular in shape, but of the very finest flavor, sweet and delicious. I have the largest stock of Sharpless plants that I have ever grown, but the demand for them is always great, so place your order as early as possible.

STEVENS' LATE CHAMPION. This valuable variety makes strong, vigorous plants which yield heavy crops of fruit. The fruit is large, long, a little flattened, and sometimes slightly creased, but generally smooth. The color is bright red, and the flesh is also red, but lighter. It has a firm surface protected by prominent seeds.

SENATOR DUNLAP. The Dunlap is a variety that beginners who know practically nothing about strawberries can succeed with. The foliage is tall, upright with a long leaf, and has more than the ordinary power of developing a heavy crown system. It has an extra long flowering season; the bloom is handsome and exceedingly rich in pollen, which makes it very valuable to plant with such pistillate kinds as ripen in its season. Its long roots go down into the sub-soil for moisture, and a severe drought has less effect on it than most others. The fruit is a dark red, with a glossy finish, shading to a dark scarlet on the under side, with prominent yellow seeds that look like gold embedded in highly colored wax. The meat is bright red all through and exceedingly juicy. For a medium size, very productive, mid-season berry, don't hesitate to plant Dunlap.

SUCCESS. One of the finest early varieties for the home garden. Berries round or slightly elongated, bright scarlet or flame color, quite large and very uniform in size, color and shape. Plants are vigorous, healthy and most prolific. Though the berries are not firm enough to endure long shipment, it is one of the most profitable strawberries for local market and very desirable for the home garden.

TWILLEY. Large in size, well colored and exceedingly firm. The eating quality is excellent. Makes a large, vigorous foliage of healthy, rich, light green foliage. One grower says he clears more money per acre from Twilley than from any other variety he grows.

WM. BELT. A king among strawberries. The plant is vigorous and succeeds upon a great variety of soils, and invariably yields very heavily. It begins to ripen quite early and continues almost to the close of the season. It is firm and a good shipper and gives large pickings for a longer period than most varieties.

WARFIELD. A well-known standard shipping and canning berry. Plants very vigorous and productive. Fruit large, nearly round, dark, glossy red, firm and of good quality. It seems as if this old variety gets better all the time.

WARREN. Originated by Mr. S. H. Warren, of Massachusetts, the well-known strawberry judge who spent most of his life in growing fancy strawberries, and he claimed this the best he ever grew. The fruit is so large and handsome it is one of the first to sell at a good price, even in a glutted market; it also is an extra berry to stand up after being packed, therefore a good shipper.

Fall or Everbearing Strawberries

Another year has proven that fall bearing strawberries are the most valuable addition to the strawberry world that has ever been known. All over the country people are beginning to realize their possibilities, and those who a year or two ago were skeptical are now enthusiastic.

Outside of the labor of keeping the blossoms off the first year, their care is no different than that given the spring sorts, and the returns they will give you the first year alone will be worth many times the money and labor expended on them.

If you desire to raise fruit for market these fall-bearing varieties will give you an opportunity to sell when the strawberry supply is limited. Fall bearing strawberries have opened up a new field for the commercial grower.

They are no harder to grow than the "June only" kind. For full crops in autumn it is best to remove all blossoms until about the first or middle of July. In all other respects they should be given the same treatment as other varieties of strawberries.

Don't forget that Fall-Bearing Strawberries produce a crop the same year as set. What is just as important, they produce a big crop the following June the same as the standard varieties, and then bring another crop in the fall of the second season.

AMERICUS. The plant of the Americus is very healthy and a strong grower; the berry is medium to large in size, firm, uniform shape, bright red through and through. The plant when loaded with berries is a beauty. The berries have the wild strawberry flavor, and I consider it the best flavored of all strawberries. I have the nicest lot of Americus plants that I have ever grown.

IDEAL. One of the newest of the ever-bearers and also considered one of the best. The plant resembles both Progressive and Superb. The berry resembles Progressive but larger. More productive than Superb but not as productive as Progressive. Makes runners freely. Worth a trial.

PEERLESS. A new ever-bearing variety introduced by Samuel Cooper, of New York. Mr Cooper also introduced Superb, and in comparison he says: "Peerless is better than Superb, being a more vigorous grower, more productive of somewhat larger fruit and fully equal to Superb in quality." After fruiting Peerless one season I find it all Mr. Cooper claims for it, especially in the quantity and size of the fruit. If you are growing Superb, try a few Peerless.

PROGRESSIVE. A wonderful fall-bearing strawberry and considered the best by many growers. The spring-set plants not only produce a big crop of berries the same season, but the runner plants commence to bear fruit as soon as set, and quite often you will find a runner plant full of blossoms and berries before it has made any roots, and in this way Progressive yields a crop of fruit the first year that is truly wonderful. The fruit of the Progressive is of good size, smooth, of good color and appearance. The plant is a good grower and healthy.

STANDPAT. This would be the best of the fall-bearing strawberries if it would only make more plants; the berries are large, and it is one of the most prolific of them all; very fine flavor and firm. For the "hill system" of growing it is ideal after you once get the plants. I have only a few hundred of the plants, and will supply you as long as my stock lasts. Price, 10 plants \$1.25, 25 plants \$2.50.

SUPERB. Some growers consider the Superb the best of the fall-bearing sorts, but I find the Progressive the best with me. The Superb is not as good a grower as the Progressive, but is ideal for the hill

system of growing; nor does it produce as many berries, but the berries are of large size and very handsome. It resembles the Chesapeake so much that some persons have mistaken it for the Chesapeake. The Superb is not only a good fall-bearing sort, but one of the most profitable varieties to plant for a regular season crop.

TOP NOTCH. A wonderful ever-bearing variety. It is a strong, luxuriant grower, leaves are round, dark green, very tough, and not affected by any leaf spot. One of the most productive of the ever-bearers. Its fruit being fully as large as that of the Superb and much more productive with me. If you want something extra good try Top Notch. I only have a few hundred plants for sale this season and not more than 25 to any one person. Price, 10 plants \$1.25, 25 plants \$2.50.

TOP NOTCH—Big, sweet and productive.

I Would Advise You to

Place Your Order At Once

The Supply Is the Shortest In Years

BRANDYWINE—Produces a fine crop of large, handsome berries.

Important

When sending your order go by these prices. Do not order less than 500 plants of a variety at the thousand rate, and if you want less than 500 plants of any one variety send pay as per this list. My plants are grown in different fields and it is much more costly to fill small orders than to fill large orders.

PARCELS POST.

If you will add 10 cents per 25 plants or 20 cents per 100 plants, I will send strawberry plants by parcel post, prepaid, to any part of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Ohio, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, District of Columbia and North Carolina; or, if you prefer, I will ship by parcel post, if ordered by you

to do so, and will instruct your postmaster to collect from you on delivery of goods the actual cost of mailing. To those who live in the States not mentioned above and who want their plants sent by parcel post they may have them sent this way and can pay their postmaster the amount of the postage on receipt of the plants.

Apple Trees

The apple is easily the first in importance of all fruits, the growing of which is today one of the leading enterprises of the United States. It will thrive on any well-drained soil, its period of ripening extends over a longer period than any other fruit, and by careful selection of varieties, a constant succession can be obtained.

For family use no fruit is more indispensable or as healthy as the apple. No one who has a place to plant should hesitate to plant an orchard, or at least a few trees for family use.

Prices of Apple Trees:

	Each	10	100	1000
4 to 5 years old, 6 to 8 feet (bearing size)	\$0 50	\$4 50	\$40 00	
3 years, 5 to 6 feet.....	45	4 00	30 00	275 00
2 years, 4 to 5 feet.....	35	3 00	25 00	225 00
2 years, 3 to 4 feet.....	30	2 50	20 00	150 00

PARAGON (Mammoth Black Twig). Winter. A round apple, of extra-large size; skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, of excellent quality in every way. Tree is vigorous and healthy and yields big crops every year.

STAYMEN'S WINESAP. November to April, but keeps well to May. A profitable sort to grow for market, and the best for home use. Large in size, fine appearance, good flavor, juicy and crisp, color red. A great success.

EARLY HARVEST. Ripens early in August. Medium size; pale yellow, fine flavor. Tree a moderate grower and a good bearer.

YELLOW TRANSPARENT. Fruit medium to large, with a brilliant waxy skin; flesh is tender, crisp and juicy, color yellow. Summer apple growing offers a large profit to the fruit grower, and the Yellow Transparent is the variety to plant.

GANO. Fruit very large, color red, flesh pale yellow. November to March.

NORTHWESTERN GREENING. Fruit large, color green, which turns yellow at full maturity; flesh yellow, tender and juicy.

BEN DAVIS. Large, round, with red stripes. Flesh white, juicy, sub-acid. November to March.

YORK IMPERIAL. A very good one, trees come into bearing early, and bears a good crop each year. Skin bright yellow covered with bright red and striped, very large. Suitable to any part of the country.

JONATHAN. Most beautiful of all apples. Season November to April. Fruit medium to large, roundish, yellow nearly covered with red, fine grained, tender and finely flavored.

WINESAP. Medium to large size. Red color; flesh yellow, firm, crisp, with rich high flavor; quality very good. November to May.

BALDWIN. Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor; very vigorous and productive. The best all-around winter apple for New England and Northern States. Splendid keeper. December to March.

WEALTHY. Fruit large, skin smooth splashed with dark red; flesh white, tender, juicy, sub-acid. November to January.

RED ASTRACHAN. Large, nearly covered with deep crimson, juicy, rich, acid, beautiful. Tree a vigorous grower. A good bearer. August.

RED JUNE. Medium in size, red. Flesh white, tender, sub-acid, beautiful. The tree is a vigorous grower, with large foliage. Abundant bearer. July.

ROME BEAUTY. Very hardy. Fruit large, almost entirely covered with bright red, of highest quality. December to March. A very good one.

WINTER BANANA. Size large, golden yellow, and beautifully shaded with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich, aromatic flavor. Season November to January.

NORTHERN SPY. Large, bright, light red and yellow. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree strong grower. November to March.

WOLF RIVER. Winter. Exceedingly large and handsome. Skin is a bright yellow, mottled and blushed with deep red. Remarkably good shipper.

SPITZENBURG. Winter. Medium size, round; dark red almost all over; firm, crisp, sub-acid. One of the very richest flavored of all apples.

GRIMES GOLDEN. Very large, skin golden yellow; flesh tender and crisp. A very good fall apple. September to January. Grown in all sections of the country.

McINTOSH. Medium size, nearly covered with a bright red; flesh yellowish, tender, juicy; sub-acid. October to February.

TRANSCENDENT (Crab). Fruit large for its class, golden yellow with a beautiful rich crimson cheek; when ripe, red and crimson covers the fruit; flesh creamy yellow, sub-acid. Tree a rapid grower and very productive. September.

FLORENCE (Crab). Large, handsome crimson, splashed with dark red; good grower, very prolific and one of the best. September.

ROME BEAUTY

Peach Trees

Everybody delights in the flavor of a fine, juicy peach. They succeed best on high, dry and well-drained soil, and are a sure crop if planted on northern or western exposure.

Peaches are borne on wood of the previous season's growth, and it is essential that they should be pruned some almost every season to let in light and air and remove dry branches. Keep your trees in good shape. The ground should not be seeded, but kept in good cultivation. Fertilize with some good soiling crop—oats, rye or cow peas, plowing it under while green. Wood ashes, if you can get them, not piled up around the trees, but scattered well, are a good fertilizer.

It takes but a short time for them to come into bearing. Keep the trees in good shape and you will be well repaid with good crops of fine fruit.

Prices of Peach Trees:

	Each	10	100	1000
4½ to 6 feet, ¾ to 1 inch.....	\$0 35	\$3 00	\$23 00	\$225 00
4 to 5 feet, ⅝ to ¾ inch.....	30	2 75	20 00	175 00
3 to 4 feet, ½ inch.....	25	2 25	17 50	150 00

J. H. HALE (Freestone). This notable new variety of peach is very large in size and globular in shape. In color it is a deep, golden yellow overlaid with bright carmine. The skin is thick, smooth and without fuzz and is tightly drawn over the solid flesh. The flesh is deep yellow, fine grained, firm, tender and with a very delicious flavor. It is of the Early Crawford type, ripening a little later than Early Crawford and about a week ahead of Elberta. The trees are strong, vigorous growers, and are unusually hardy. Reports indicate that due to its solid flesh it is an exceedingly good shipper, and great things are expected of this new Hale peach as a commercial variety. Valuable also for the home garden.

ELBERTA. Mid-season. A valuable large peach of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

BELLE OF GEORGIA. Ripens here the first to fifteenth of August. Fruit is large, white with red cheek, flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

CHAIR'S CHOICE. Begins to ripen here about the first of September. Large in size; flesh firm, of the sweetest and richest grape flavor; color yellow. Freestone.

CRAWFORD'S LATE. Ripens with Chair's Choice. Freestone. High quality and very large size; flesh deep yellow; skin yellow with a broad dark red cheek.

MAYFLOWER. Semi-cling. The earliest peach known; very handsome appearance, backed by a delicious flavor.

HILEY. This is a seedling of Belle of Georgia and is one of the best Chinese type, which are our most hardy peaches today; ripens about one week before the Belle of Georgia. A large creamy white peach with rich blush on sunny side; a long keeper and a fine shipper. A perfect freestone.

WHITE HEATH CLING. Ripens from September 10th to 15th. This is an old variety of cling peach and has never been excelled by any other of its class. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for canning purposes.

GREENSBORO. Ripens here from June 25th to July 10th. Large in size; white in color with a red cheek. Flesh rich and melting; very juicy; tree a strong grower. Anyone who has a yard or garden should set a few trees of this wonderful peach.

CHAMPION. An extremely good, early peach. Skin creamy white with red cheek; a perfect freestone, which is a rare thing among early peaches; very hardy; regular bearer.

CARMEN. A very hardy peach, ripening here about the middle of July; skin pale yellow, with blush on sunny side; flesh white, tender, sweet and melting. Ships well. The best early market peach.

RAY. Tree a fine grower. Fruit ripens early in August, of large size, very productive, white with red blush. Freestone. A very good one.

FRANCES. Freestone. Ripens last of August. A seedling of Elberta and of same size and quality, skin yellow with red blush, flesh yellow.

CRAWFORD'S EARLY. Freestone. Large, oblong, yellow with deep red cheek; flesh yellow, juicy and rich, excellent flavor.

Pear Trees

Fine flavor, reliability, profit, long life of trees, and general goodness make Pears a staple fruit. They are good to have in a home-orchard, on a lawn, or about a farm—for home use. They are making money for many men, the income of whose farms is increased considerably by the returns from the Pears the owners sell.

Prices of Pear Trees:

	Each	10	100
First-class, 5 to 6 feet.....	\$0 50	\$4 50	\$40 00

KIEFFER. One of the most profitable market pears. It is an abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Will produce ten bushels of pears to the tree when ten years old, begins fruiting successfully when three years old. Season October.

CLAPPS FAVORITE. Summer. Fruit large, yellow lemon color, spotted with brown dots; flesh fine, rich and sweet. A very good one.

SECKEL. Medium size, skin rich, yellowish brown with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored pears known. Summer.

BARTLETT. Season last of August to September 15th. Good strong grower, flesh is white, fine grained, luscious, large and buttery, has a rich, melting flavor and very sweet.

Plum Trees

Plums are so easily grown, thrive so well with little care and even in spite of neglect, and respond so liberally to good care that they should find a place in every home orchard. They succeed in almost any soil, and are often planted in the chicken yard and out-of-the-way corners when other space is not available. Plant 18 to 20 feet apart.

Prices of Plum trees	Each	10	100
First-class, 5 to 6 feet.....	\$0 50	\$4 50	\$40 00

RED JUNE. Ripens first of August, fruit large; flesh light lemon yellow, half cling; slightly sub-acid and of good quality. Very productive.

BURBANK. Fruit very large; dark violet red; flesh juicy and pleasant. Ripens middle of August. Productive.

GERMAN PRUNE. Dark purple or blue, juicy, rich, of best quality. September.

ABUNDANCE. Fruit very large and showy; flesh light yellow, exceedingly juicy, tender and sweet. A good market variety. July.

BRADSHAW. Large size, flesh yellowish green, juicy and sweet; skin dark violet red. Ripens middle of August.

GREEN GAGE. Skin pale green. Excellent. An old standard variety.

Cherry Trees

The tree is very hardy and will thrive in almost any soil, providing it is well drained. It is the most profitable of all fruits that are grown. Fruit-growers are realizing this more and more, and enormous profits are being realized from young orchards.

Prices of Cherry Trees:	Each	10	100
First-class, 5 to 6 feet.....	\$0 50	\$4 50	\$40 00

GOVERNOR WOOD. Yellow with red cheek; tender, rich, delicious, very fine, large, roundish, depresses at stem; productive. Early.

BLACK TARTARIAN. Black; very large, juicy, rich and sweet. Productive. Ripens last of June.

DYE HOUSE. Medium size; skin red, flesh juicy and tender. June.

MONTMORENCY. Large, bright shining red; acid, hardy and productive. Late.

EARLY RICHMOND. Medium to large, dark red, juicy, good flavor. June.

ENGLISH MORELLO. Large size. Color dark red, quality very good. Late.

Asparagus Roots

Splendid for home garden or market. The plants are very easy to grow, and a bed when once established will thrive for many years.

As a field crop, asparagus is very profitable, and there is seldom an over-supply in the city markets, the prices remaining high throughout the season.

Any good garden soil will give excellent crops, but it should be manured freely.

	50	100	250	500	1000
One-year roots.....	\$.50	\$.75	\$1.50	\$2.15	\$4.00
Two-year roots.....	.60	1.00	1.75	2.65	5.00

GIANT ARGENTEUIL. One of the standard varieties and favorably known among growers everywhere; probably the largest, and almost invariably commands good prices.

CONOVER'S COLOSSAL. Another good old standard; tips of best quality and of large size; a very rapid grower.

PALMETTO. Early, large and comparatively free from rust; makes a heavy yield. Very popular and regarded by most growers as one of the most profitable of the market sorts.

COLUMBIAN MAMMOTH WHITE. Bears large, pure white tips of unusually fine quality; remains a long time in excellent condition after cutting.

ST. REGIS—Bears both Spring and Fall.

Raspberry Plants

Raspberries will succeed in any good soil suitable for garden vegetables, and amply repay high culture. The best fertilizer is ground bone. Plant in rows 4 feet apart and plants 3 feet apart in the rows. Pinch tops out of young canes when 3 feet high, so they will branch and become stocky. Cut out all old wood which dies as soon as the fruit ripens. Price, 50c. for 10; 85c. for 25; \$1.60 for 50; \$3.00 for 100; \$25.00 for 1,000.

ST. REGIS. Red. This promises to be the most valuable addition to the list of Red Raspberries. It succeeds upon all soils, whether light and sandy or heavy clay, and the canes are absolutely hardy always and everywhere. The canes are of a stalky, strong growth with a great abundance of healthy, dark green foliage. The only variety known that gives a crop of fruit the same year planted, and two crops a year thereafter. Plants set in early spring will give a small crop of fruit the fall following, and the next spring a big crop equaling that of any red Raspberry known. The berries are large, beautiful and attractive. If you have failed with every other variety of Raspberry, either North or South, plant St. Regis and succeed.

COLUMBIAN. Purple. The Columbian is a variety of the Shaffer type, of remarkable vigor and productiveness. It is very hardy, and propagates from tips the same as Blackcaps. Fruit large, shape

somewhat conical, color dark red, bordering on purple; adheres firmly to the stem, and will often dry on the bush if not picked; seeds small and deeply imbedded in a rich, juicy pulp, which has a distinct flavor of its own, making it a most delicious table berry.

CUTHBERT. Red. This is a strong grower with healthy foliage, and on good soil it is very productive. Cuthbert is one of the old standard, reliable sorts that will give a good crop of large red berries of very fine quality, and it is probably more largely grown than any other variety.

PLUM FARMER. Black. Berries thick-meated, firm, with a bloom similar to Gregg; large in size and attractive when picked ready for market. Maturing its entire crop in a very short period makes it one of the most profitable of the early market sorts.

Grape Vines

The Grape is one of the most important of the small fruits, not only commercially in various sections, but for the home garden. There is no fruit more easily grown in any soil and in any climate in the country. It takes little room in the home garden, for the garden fences can be transformed into trellises, and not only answer their purpose as an enclosure, but will be made more beautiful and attractive when covered with the vines.

Prices 15c. each; \$1.25 for 10; \$10.00 per 100.

CONCORD. Black. Early; decidedly the most popular Grape in America, and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well. Succeeds everywhere.

NIAGARA. Leading white market variety. Bunch and berry large, greenish white, changing to pale yellow when fully ripe. Quality excellent. August.

MOORE'S EARLY. Black. Bunch; rarely shouldered, not quite so large as Concord; berries larger and very much like it in flavor and quality. Foliage thick, leathery, somewhat resembling Concord, except on the under side, which is covered with a yellowish-brown down. Ripens so early as to be nearly out of the market before Concord starts in, therefore a very popular early market variety.

DIBBLE'S RUSSET—The best main-crop potato I have ever grown.

SEED POTATOES

DIBBLE'S RUSSET

I am giving the introducer's description, and I honestly do not believe they can be beat for yield and quality. If there is a better one, I have never grown it.

"The vines are strikingly distinct; rich, dark green in color; very robust and luxuriant in their habit of growth, completely covering the ground at the height of their development; extremely disease resistant. The tubers are round to oblong in shape, of good size, with pure white flesh, and covered with a russet skin; few and shallow eyes, and a quality either baked or boiled that cannot be excelled; they are an excellent market variety. Dibble's Russet is enormously productive, as the tubers are as large as those of the Carman family, such as Rurals, Carmans, Raleighs, and the like; but where these varieties set only three to six tubers to the hill, with us, under identical soil and cultural conditions, the Russet produces six, eight, ten and twelve tubers to the hill.

"On our own farms the Russet is the best potato we have ever grown. Many of our customers have written us that it has outyielded other sorts two to one, and yields of 300 to 400 bushels to the acre

are not uncommon, and ninety-nine out of every hundred at least write of their wonderful qualities in the highest terms."

If you are one of the thousands of farmers who plan to grow only enough potatoes for their own use, I earnestly recommend the Russet as the best variety for you to grow on your farm. The Russet has the healthiest foliage, it is the most productive, and the tubers have the best quality of any main-crop variety with which I am acquainted. If you are growing for market and want new seed, plant Dibble's Russet.

Prices: 75c. per peck; \$2.50 per bushel. Ask for prices if you want a larger quantity.

IRISH COBBLER

The Irish Cobbler is the best extra-early White Potato now grown. The tubers are uniformly smooth, round, plump and handsome, creamy white, eyes strong and well developed. The flesh is white and of splendid quality. Cobblers do well anywhere. On Potato soil, or on clay loam or heavy land, they give good results.

Prices: Same as for Dibble's Russet.

OCTOBER STRAWBERRIES

One fruit grower in northwestern Missouri has a quarter acre patch of everbearing strawberries that were set early in April. The plants were manured very heavily; the spring and summer months were not excessively hot and there was an abundance of rain. He began picking berries early in July and continued picking from that field until early in November, during which time he picked and sold \$416.20 worth of berries. That is the best record for an everbearing strawberry patch that has actually come under my observation, but I have seen a good many other patches that have produced almost as much. From my own experience with everbearing strawberries and from what I have seen of them in other places, I feel that there is a great future for this new race of strawberries and that everyone who can spare the room for them should have a few, say five hundred or a thousand plants. And the fact that the berries come at such an unusual season of the year makes them taste so much better than if they came at the same time as our ordinary spring kinds. The strawberry is a fruit one never tires of eating, and to have the fresh fruit from the field in late summer makes them all the more delicious.—E. H. F. in January 1919 issue of Successful Farming.

Shade and Ornamental

Have you seen a dwelling, the grounds of which are barren of trees and vines? Have you seen a farm upon which there is no orchard, or fruit bearing trees? Have you seen these homes and farms after they have been beautified and made fruitful and profitable by the judicious planting of ornamental trees and shrubs? Bring these two pictures to your mind, one representing a house about which no trees or shrubs have been planted, the other showing the same place after planting. The first is a picture of desolation. The planting of one tree would relieve the barren appearance. The planting of fruit trees in the rear, and a few shrubs and trees in the front yard, or at one side, would create a transformation. Plant plum or peach trees to beautify a barren home and supply fruit for the table. Duty to your family urges you to plant.

NORWAY MAPLE. A large, handsome tree of spreading rounded form, with broad deep-green foliage. Largely planted.

	Each	10	100
8 to 10 feet.....	\$1.00	\$9.00	\$80.00
10 to 12 feet.....	1.25	10.00	90.00
19 to 20 ft. extra.....	2.50		

SILVER MAPLE. Produces a quick shade. Growth is thick and dense, leaves are large and stately.

	Each	10	100
7 to 8 feet.....	\$0.40	\$3.50	\$30.00
8 to 9 feet.....	.60	5.50	45.00
9 to 10 feet.....	.80	7.50	

SCHWEDLERI MAPLE. Has three changes of dress in a season. Spring purple and crimson, summer dark green, autumn brown and red. Largely planted. 8 to 10 feet trees, \$1.50 each.

AMERICAN ELM. A fine wide spreading tree, gracefully curving branches. 7 to 8 feet trees, 75c. each, \$6.00 for 10.

ORIENTAL PLANE. Has a very wide, round topped head, thick branches; very rapid grower. A good one. 8 to 10 feet trees, \$1.00 each.

CATALPA BUNGEI. Round headed Catalpa. Very effective for lawn planting. 4 to 5 feet stems, 2 year crowns, \$1.50 each.

CATALPA SPECIOSA. Fine for shade. A rapid grower, very hardy. Price 8 to 10 feet, 60c. each; \$5.50 for 10.

JAPAN BLOOD RED MAPLE. Leaves extremely red; red bark. Unquestionably as an ornament for the lawn it is without an equal. Price, 3 feet trees, \$2.25 each.

MAGNOLIA TRIPETELA. A free growing tree. Leaves from 1 to 2 feet long; flowers white, from 4 to 6 inches in diameter. Price, 6 to 8 feet, \$1.00 each.

HORSE CHESTNUT. White flowering. Leaves dark green. Price, 6 to 8 feet trees, \$1.00 each.

LOMBARDY POPLAR. A tall, spire-like tree. Largely planted. Price, 10 to 12 feet trees, \$1.00 each.

EVERGREENS

NORWAY SPRUCE Perfectly hardy. Makes a beautiful growth. A choice Evergreen and widely planted.

	Each	10	100
2 to 3 feet.....	\$0 75	\$7 00	\$60 00
3 to 4 feet.....	1 00	9 00	80 00
4 to 5 feet.....	1 25	12 00	100 00

AMERICAN ARBORVITAE. Much used on lawns and in tubs for porches, etc. Foliage is flat and bright green. Very dense.

	Each	10	100
2 feet.....	\$0 50	\$4 50	\$40 00
2½ to 3 feet.....	0 75	7 00	60 00
3 to 4 feet.....	1 00	9 00	80 00

KOSTER'S BLUE SPRUCE. Foliage intense silvery blue, very dense. The best of all evergreens. 2½ to 3 feet, \$3.50 each.

COLORADO BLUE SPRUCE. Foliage blue mixed with green. Price, 3 to 4 feet, \$3.00 each.

DOUGLAS SPRUCE. A choice evergreen. Foliage grows downward. Tips of branches bear 3-inch cones. Price, 1 to 1½ feet, 35c. each; \$3.00 for 10. 2½ to 3 feet, \$1.00 each.

IRISH JUNIPER. The trees form a tall, dense, cone of silvery green. 2½ to 3 feet, \$1.50 each.

HEMLOCK SPRUCE. Tall with drooping branches; foliage dark green. 2½ to 3 feet, \$2.25 each.

WHITE PINE. The most valuable evergreen. Has regular whirls of horizontal branches. 4 to 5 feet, \$1.50 each.

SCOTCH PINE. Foliage bluish green and very dense. 3 to 4 feet, \$1.00 each. 4 to 5 feet, \$1.25 each.

EUROPEAN LARCH. Very beautiful, branches grow downward, and are light green, bushy and regular. Price, 5 to 6 feet, 40c. each. 6 to 8 feet, 50c. each.

BOXWOOD PYRAMIDAL. (Broad-leaved Evergreen.) Popular for planting as individual specimens. 2 to 2½ feet, \$2.50 each.

NUT TREES

AMERICAN SWEET CHESTNUT. Flowers in June. Nuts sweeter than other kinds. Price, 6 to 8 feet trees, \$1.00 each.

JAPAN WALNUT. Produces nuts of best quality. 5 to 6 feet trees, 75c. each.

PECAN. Very large nuts, 50 to the pound. 3 to 4 feet trees, \$1.50 each.

ENGLISH WALNUT. Well known, justly popular. 7 to 8 feet trees \$1.50 each.

WEEPING TREES

PURPLE RIVERS BEECH. Very attractive for lawn planting. 4 to 5 feet trees, \$1.25 each.

WISCONSIN WEEPING WILLOW. Very attractive for lawn planting. 6 to 7 feet trees, 30c. each; \$2.50 for 10; \$20.00 for 100.

CUT LEAF WEEPING BIRCH. Famed for its beauty and graceful habit. 6 to 8 feet trees, \$1.25 each.

MULBERRIES

RUSSIAN. Makes rapid growth, bears when young 3 to 4 feet trees, 20c. each; \$1.75 for 10.

TEAS WEEPING MULBERRY. Wonderfully ornamental; also fruits heavy when young. 6-foot stems, 1-year heads, \$1.75 each.

Spirea Van Houttei

Flowering Shrubs

Spirea Van Houttei. Plant is rather tall, with long slender branches that gracefully droop with their foliage and flowers. Flowers in May. Hardy. Price, 4-year, 4 to 5 feet, 40c. each; \$3.00 for 10. Price, 2-year, 3 to 4 feet, 25c. each; \$2.00 for 10.

Spirea Anthony Waterer. Dwarf and very dense, fine for base planting. Blooms the entire summer, rose pink flowers. Price, 2 to 3 feet, 35c. each; \$3.00 for 10.

Hydrangea Paniculata Grandiflora. Well known and justly popular. Flowers are borne on huge panicles from 8 to 12 inches long, pure white. Blooms in August and does not drop bloom until freezing weather. Price, 2½ to 3 feet, extra strong, 30c. each; \$2.50 for 10.

Japan Snowball. A new variety from North China. It surpasses the old variety in several respects. Produces globular heads of pure white flowers. Price, 2 to 3 feet, 35c. each; \$3.00 for 10.

Common Snowball. Favorite shrub with globular clusters of white flowers latter part of May. Price, 2 to 3 feet, 25c. each; \$2.00 for 10.

White Lilac. Delicate white flowers shaded with purple, blooms in May. Price, 2 to 3 feet, 30c. each; \$2.50 for 10.

Charles X. Lilac. Well-known favorite. Purplish-red flowers. Price, 2 to 3 feet, 30c. each; \$2.50 for 10.

Philadelphus Grandiflorus. Flowers white, in June, highly perfumed. Price, 2 to 3 feet, 20c. each; \$1.50 for 10.

Spirea Thunbergii. White flowers, early. 3 to 4 feet, 35c. each; \$3.00 for 10.

Weigela Eva Rathke. Flowers in June, pure white to red. Price, 3 to 4 feet, 35c. each; \$3.00 for 10. 2 to 3 feet, 25c. each.

Weigela Rosea. Bright rose colored, flowers in June. Price, 2 to 3 feet, 20c. each; \$1.50 for 10.

Deutzia Crenata. Double white, flowering in June. Price, 3 to 4 feet, 30c. each; \$2.50 for 10. 2 to 3 feet, 20c. each; \$1.50 for 10.

Deutzia Pride of Rochester. Flowers larger than Crenata, white, the outer petals being flushed with rose. Price, 3 to 4 feet, 30c. each; \$2.50 for 10. 2 to 3 feet, 20c. each; \$1.50 for 10.

Althea. (Rose of Sharon.) Blooms in Autumn. We have the red, white and blue. Price, 3 to 4 feet, 35c. each; \$2.75 for 10. 2 to 3 feet, 20c. each; \$1.50 for 10.

Forsythia Fortunei. Deep yellow flowers. April. Price, 2 to 3 feet, 20c. each; \$1.50 for 10.

Butterfly Bush. (Summer Lilac.) A beautiful shrub from Japan, bearing sweet-scented flowers of a rosy lilac color; blooms in great profusion all summer. Price, 2 to 3 feet, 20c. each; \$1.50 for 10. 3 to 4 feet, 25c. each; \$2.00 for 10.

Silky Dogwood. Flowers yellow, bark blood red. Price, 2 to 3 feet, 25c. each; \$2.00 for 10.

Scotch Broom. Flowers yellow, branches resemble ferns. Price, 3 to 4 feet, 25c. each; \$2.00 for 10. 4 to 5 feet, 30c. each; \$2.50 for 10.

HARDY CLIMBING SHRUBS

Wisteria Purple. Fine for trailing porches, etc. Flowers purple. 2-year, strong, 30c. each.

Wisteria White. Flowers white, 2-year, strong, 30c. each.

Honeysuckle. Halliana. Flowers from May to November. 25c. each.

ROSES

Frau Karl Druschki. (Hybrid Perpetual.) Snow white. Large and fragrant. Very good. June. Price, 2-year, 45c. each.

Margaret Dickson. (Hybrid Perpetual.) Large white, with flesh-colored center. Fragrant. Price, 2-year, 45c. each.

Paul Neyron. (Hybrid Perpetual.) Large pink, often measures 5 inches across. Price, 2-year, 45c. each.

Gruss An Teplitz. (Hybrid Teas.) Everblooming. Scarlet crimson. Price, 2-year, 45c. each.

Baby Ramblers. Clear brilliant ruby rose. Blooms early in June and continues until frost. Price, 2-year, 45c. each. We have them red, white and blue.

Crimson Rambler. Deep crimson, flowers in trusses. Price, 2-year, 35c. each.

Dorothy Perkins. Rambler. June and July. Immense trusses of delightful pink flowers. Price, 2-year, 30c. each.

A Hedge of California Privet

California Privet

A vigorous-growing hedge, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants, this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green, and will remain on the plants nearly all winter, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a very strong grower, it can be kept to a low size by frequent trimming. Where a close, compact hedge is required I recommend California Privet. Should be planted about 8 to 10 inches apart to give best results.

2-year, 2 to 3 feet.....	07	60	3 00	6 50	11 50	23 00

Barberry Thunbergii

A low, dense shrub, with bright green leaves, assuming beautiful tints of crimson, scarlet and orange in the autumn, and with brilliant red berries which persist throughout the winter. Its low, thick growth makes it a very desirable hedge plant, and as it withstands any amount of trimming, is used extensively for this purpose; it is also used for massing and for specimen planting. Its extreme hardiness makes this a most valuable plant for the North.

	Each	10	100	250	500	1000
2-year, strong, 12 to 18 inches....	10	75	4 00	8 00	15 00	30 00

TINGLE'S SEED COLLECTION.

15 PACKETS, POSTPAID, FOR 50 CENTS.

A complete collection of vegetable seeds, enough for a good-sized family, sent to you by mail, postpaid, at about one-half regular prices. Only by putting these collections up in our spare time can I afford to sell them at this price.

- 1 Packet Black Wax Beans.
- 1 Packet Kentucky Wonder String Beans.
- 2 Packets Sweet Corn, 2 varieties.

SWEET VIOLETS.

Violets are a great favorite and do well in the open ground. If given a sheltered place or planted on the sunny side of a building, they will usually begin blooming before the snow is gone, and continue bearing their lovely, sweet-scented flowers for several months, and then again in the fall. Price, 15c. each, \$1.00 per dozen, postpaid.

PANSY PLANTS.

My pansy plants are of an especially fine strain, flowering from early spring to late fall. They are luxuriant in their growth, producing very large spotted flowers, the colors of which are remarkable for their warmth and purity. Price, 15c. each, \$1.00 per dozen, postpaid.

FIELD SEED CORN

Improved Farmers Favorite Golden Dent. If you want to grow a bumper crop of beautiful golden yellow corn this year plant this corn. It matures its crop in 85 to 90 days and will produce 80 to 100 bushels of shelled corn per acre on medium good land. The ears are large, 18 to 20 rows around a small, yellow cob, ears 8 to 11 inches long; makes a large crop of fine fodder.

Wonderful Maryland Twin White Corn. Unexcelled for ensilage. Grows from 10 to 12 feet tall; ears 7 to 11 inches long, 14 to 18 rows of kernels around a small, white cob, produces 2 to 3 ears to a stock. One bushel of this corn shelled weighs 60 pounds. Matures in 110 to 115 days; produces from 80 to 115 bushels of shelled corn per acre. A truly wonderful corn—you should try it.

Prices of above 2 varieties of corn: 40c per quart postpaid; by express \$1.50 per peck, \$2.25 per half bushel, \$4.00 per bushel.

- 1 Packet Cucumber, good variety.
- 1 Packet Squash, good variety.
- 1 Packet Early Cabbage.
- 1 Packet Late Cabbage.
- 1 Packet Onions, Prize Taker.
- 2 Packets Tomatoes, 2 varieties.
- 1 Packet Muskmelon or Cantaloupe.
- 1 Packet Watermelon.
- 1 Packet Lettuce.
- 1 Packet Radish.

ATTRACTIVE PRICES.

Send me your want list for my prices on vegetable and field seeds, such as Tomato, Pumpkin, Onion, Cabbage, Muskmelon or Cantaloupe, Pepper, Eggplant, Parsley, Squash, Lettuce, Asparagus, Okra, Watermelon, Cucumber, Beet, Radish, Carrot, etc. Always state quantity wanted of each variety when asking for prices.

Why Tingle's Plants Grow

Our Strawberry plants are taken from young beds, fresh dug before shipment; plants are well-rooted and not dug from old or run-down beds. These plants are from beds that have never borne a crop and will bring you best results. In the fall our ground is plowed to a good depth, and then we broadcast stable manure on top of the plowed ground, then let it stay this way until spring; we then thoroughly pulverize the soil, and at the same time mixing the manure with the soil by harrowing. After the plants are set and begin to make runners we fertilize them with commercial fertilizers; this is repeated late in the summer. The deep plowing with an abundance of plant food given the plants causes them to make a splendid growth with lots of long, fibrous roots. You need these kind of plants, and it will pay you to get them. Which kind of plants had you rather have, plants that have been carefully grown and that are full of life, which will produce big crops, or plants that have not been fertilized—plants that have been grown only for quantity without a thought of quality? If you want the kind that will make you a successful berry grower, and that will produce you the largest and best crops, plant Tingle's full of life plants—they succeed.
